What this standard covers

This standard specifies a substantially circular cross-section, the measurement method for broadcast receiver antenna rod magnetic properties. Inductance L and quality factor Q is defined as the measured antenna stick together and specific measurement coil inductance and quality factor.

Document data

International classification (ICS): 29.040.10.

Chinese classification (CCS): L19.

Estimated length of the Chinese original: 5,517 words.

Adopted international standard: IEC 60492-1974, IDT.
