What this standard covers

This standard provides a common method for the determination of insoluble matter by gravimetric method. This standard applies to the determination of water -soluble solid chemical reagents insolubles. The determination of water insoluble matter with the standards and specifications by the sample volume value the quality of the resulting insoluble material shall not be less than 1 mg. This standard does not apply to the determination of instability or corrosive chemicals glass filter crucible water insolubles in boiling water.

Document data

International classification (ICS): 71.040.30.

Chinese classification (CCS): G60.

Estimated length of the Chinese original: 5,557 words.

Adopted international standard: ISO 6353-1-1982, NEQ.

Supersedes the earlier edition GB/T 9738-1988.
