What this standard covers

This standard provides a common method for determining evaporation residue by gravimetric method. This standard applies to be volatile in the boiling water bath temperature and measuring the residue of the net addition to the main chemical reagent evaporation. When measured by the standard evaporation residue, residue quality specifications according to sample size and the resulting value is not less than 1 mg.

Document data

International classification (ICS): 71.040.30.

Chinese classification (CCS): G60.

Estimated length of the Chinese original: 7,731 words.

Adopted international standard: ISO 6353-1-1982, NEQ.

Supersedes the earlier edition GB/T 9740-1988.
