Foreword

GB/T 9833 "Pressed" is divided into nine sections.

--- Part 1. Flower brick tea;

--- Part 2. black brick;

--- Part 3. Fu tea;

--- Part 4. Kang brick tea;

--- Part 5. Tuocha;

--- Part 6. tea tight;

--- Part 7. golden tip tea;

--- Part 8. m brick;

--- Part 9. brick tea. This part of GB/T 9833 Part 2. This section drafted in accordance with GB/T 1.1-2009 given rules. This Part replaces GB/T 9833.2-2002 "black brick tea brick tea." Compared with GB/T 9833.2-2002, major technological changes as follows:

--- Remove physical and chemical indicators in Note 1, the physical and chemical indicators of water extracts to determining indicators;

--- Health indicators using GB 2762 "contaminants in food limited", GB 2763 "national food safety standards for pesticides in food Maximum Residue Limits "and GB 26130" food paraquat and other 54 kinds of pesticide maximum residue limits "requirement, instead of defunct GB 9679-1988 "tea health standards";

--- Judgment rule to the project according to the requirements of Chapter 4, any one of non-compliant products as unqualified products. This part is proposed by the China Federation of Supply and Marketing Cooperatives. This part of the National Technical Committee of Standardization Tea (SAC/TC339) centralized. This section was drafted by: China Federation of Supply and Marketing Cooperatives Hangzhou Tea Research Institute, China Tea Circulation Association, Hunan Tea Co. Secretary, Hunan white Shaxi tea factory limited liability company, Hunan Yiyang Tea Factory Co., Ltd. Zhejiang Wuyi camel Kowloon

brick. The main drafters of this section. Weng Kun, Yangxiu Fang, Wang, Xi-end, Yin bell, cooper Liuxue Hui, Choi Seung-volt, Zhuya Song, Mei Yu, Zeng Xuejun, Zhang Lingling, Zhang Yali. This part of the standard replaces the previous editions are.

--- GB/T 9833.2-1988, GB/T 9833.2-2002. Pressed Part 2. Black brick

1 Scope

Part 2 of China's national standard for compressed tea, covering hei zhuan or black brick tea. Black brick is the plainest and historically the most widely traded of the Hunan dark teas, pressed from black raw tea into a dense rectangular brick that was the currency of the northwestern tea trade - it travelled to Xinjiang, Gansu and beyond, where it is still drunk boiled with milk and salt rather than infused. Its production runs through the same sequence as its relatives: the raw tea is screened, semi-finished materials are blended to a formula, the tea is piled and fermented, then steamed, pressed and dried slowly. The drying is what takes the time, because a brick that is dried too fast cracks and one dried too slowly moulds in the wrong way. Unlike the flower brick, hei zhuan is not cultivated for the golden flower fungus, which is the distinction between the two products. This part specifies the requirements, test methods, inspection rules, marking, labelling, packaging, transport, storage and shelf life for black brick tea.

GB/T 9833 provisions of this part of the black brick requirements, test methods, inspection rules, marking, labeling, packaging, transportation, storage and security Shelf. This section applies to black raw tea leaves as the main raw material, through Maocha screening, blending semi-finished products, pile, steam pressing, drying, finished package Equipment such as black brick tea made from the process.
