Foreword

GB/T 9833 "Pressed" is divided into nine sections.

--- Part 1. Flower brick tea;

--- Part 2. black brick;

--- Part 3. Fu tea;

--- Part 4. Kang brick tea;

--- Part 5. Tuocha;

--- Part 6. tea tight;

--- Part 7. golden tip tea;

--- Part 8. m brick;

--- Part 9. brick tea. This part of GB/T 9833 Part 5. This section drafted in accordance with GB/T 1.1-2009 given rules. This Part replaces GB/T 9833.5-2002 "brick tea Tuo." Compared with GB/T 9833.5-2002, major technological changes as follows:

--- Remove physical and chemical indicators in Note 1, the physical and chemical indicators of water extracts to determining indicators;

--- Health indicators using GB 2762 "contaminants in food limited", GB 2763 "national food safety standards for pesticides in food Maximum Residue Limits "and GB 26130" food paraquat and other 54 kinds of pesticide maximum residue limits "requirement, instead of defunct GB 9679-1988 "tea health standards";

--- Judgment rule to the project according to the requirements of Chapter 4, any one of non-compliant products as unqualified products. This part is proposed by the China Federation of Supply and Marketing Cooperatives. This part of the National Technical Committee of Standardization Tea (SAC/TC339) centralized. This section was drafted by: China Federation of Supply and Marketing Cooperatives Hangzhou Tea Research Institute, China Tea Circulation Association, Yunnan Shimonoseki Tuo (set Group) Company Limited. The main drafters of this section. Weng Kun, Yangxiu Fang, Wang, Chen Guofeng, Wu Xi

end, Chujiu Yun, Mei Yu, Yangchun Qi, Zhang Yali. This part of the standard replaces the previous editions are.

--- GB/T 9833.5-1989, GB/T 9833.5-2002. Pressed Part 5. Tuocha

1 Scope

Part 5 of China's national standard for compressed tea, covering tuo cha. Tuo cha is the bowl-shaped compressed tea of Yunnan and Sichuan - a thick-walled dome, hollow underneath, typically of a hundred grams or of a few grams for a single serving. The shape is the point of it. A dome compresses evenly and holds together without a wrapper, it stacks and travels, and the thick wall ages slowly and evenly, which matters for a tea that is expected to improve over years rather than to be drunk fresh. The small nest form made tea portable in a way that a brick never was, and it is the format in which Chinese dark tea is most widely known outside China. Production runs from sun-dried green raw tea through screening and even piling, sorting and picking over, blending of semi-finished material, steaming and pressing into the mould, and drying. This part specifies the requirements, test methods, inspection rules, marking, labelling, packaging, transport, storage and shelf life for tuo cha.

GB/T 9833 This section specifies the requirements, test methods, inspection rules Tuocha, logos, labels, packaging, transportation, storage and security Shelf. This section applies to drying green raw tea leaves as the main raw material, through Maocha uniform heap screening, sorting tick, semi-finished blending, vapor pressure developing type, dry, Process made Tuocha finished packaging.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.
