What this standard covers

This standard specifies the use of torsion pendulum device, in a wide temperature range, low frequency (0. 1Hz ~ 10Hz), strain of not more than 0. 05% under the conditions of vulcanized rubber or thermoplastic rubber measuring performance under dynamic shear state-Shear shear modulus and mechanical methods of damping.

Document data

International classification (ICS): 83.060.

Chinese classification (CCS): G40.

Estimated length of the Chinese original: 12,114 words.

Adopted international standard: ISO 4664-2-2006, IDT.
