2 Terms and Definitions

Foreword

The GB/T 9999 "China Standard Serial Number" is divided into two parts.

--- Part 1. CN;

--- Part 2. ISSN.

This section is Part 2 of GB/T 9999.

This section was drafted in accordance with the rules given in GB/T 1.1-2009.

This section partially replaces the ISSN section of the international standard serial number of GB/T 9999-2001 "China Standard Serial Number".

The main changes compared to GB/T 9999-2001 are as follows.

--- Delete "2 citation criteria";

--- Replace "3 definitions" with "2 terms and definitions";

--- Increase the terminology "2.1 Continuity Resources", "2.3 Existing Integration Resources", "2.5 ISSN Central Networks", and "2.6 ISSN

"China National Center", "2.8 China Standard Serial Number (ISSN) Metadata", "2.9 China Standard Serial Number"

(ISSN) Registration Library;

--- Change the "4 Chinese Standard Serial Number Structure" to "3 Chinese Standard Serial Number (ISSN) Structure".

The "International Standard Serial Number" and "One Domestic Unified Serial Number" are replaced by "Chinese Standard Continuous Publishing".

The item number (ISSN) consists of the prefix ISSN and 8 digits.";

--- Delete "4.2 National Unified Serial Number";

--- Increase "5 establishment of identification title";

--- Increase "6 ISSN Association (ISSN-L)";

--- Change "5 printing format and position" to "7 China Standard Serial Number (ISSN) display position and format", delete

In addition to the CN number in the 5.1.1 print format, delete 5.1.3 "Printing of National Unified Serial Number (CN Number)";

--- Add "7.3 ISSN display on electronic continuity resources and other non-printable vector resources";

--- Replace the "7 Data Item Used in China's Standard Serial Number System" with "China Standard Serial Number" (ISSN)

Metadata, specific metadata items are listed as Appendix B;

--- Change "6 Principles for the Distribution of China's Standard Serial Numbers" to "The Distribution of 4 Chinese Standard Serial Numbers (ISSN)",

Addition of China Standard Serial Numbers (ISSN) to distribute business procedures, Chinese Standards Serial Numbers (ISSN) for different carriers

With related technical content;

--- Delete "Appendix B Province, Autonomous Region, and Municipality Area Number";

--- Delete "Appendix C Journal Classification Table";

--- Add "Appendix B (Normative Appendix) China Standard Serial Number (ISSN) Metadata";

--- Added "Appendix C (Normative Appendix) ISSN Association (ISSN-L)";

--- Add "Appendix D (Normative Appendix) Role and Responsibilities of ISSN China National Center";

--- Added "Appendix E (Informative Annex) EAN Bar Code and China Standard Serial Number (ISSN)".

This section uses the redrafted law to amend the ISO 3297.2007 "Information and Documentation International Standard Serial Number (ISSN)".

This section mainly made the following changes to ISO 3297.2007.

--- In accordance with China's national conditions, this section is added to the "Scope" in Chapter 1, which applies to any carrier in the territory of the People's Republic of China.

Related content of sexual resources;

--- Increase the terminology of 2.4 "China Standard Serial Number (ISSN)" and 2.6 "ISSN China National Center";

--- Replace Chapter 3 "Structure of ISSN" with "Structure of China Standard Serial Number (ISSN)";

--- Replace Chapter 4 "Assignment of ISSN" with "Assignment of China Standard Serial Number (ISSN)";

--- Replace Chapter 7 "Printing and Display of ISSN" with "Display Position and Format of China Standard Serial Number" (ISSN);

--- Replace 7.1 "General" with "Display of China Standard Serial Number (ISSN)";

--- Changed 7.2 "ISSN display on printed continuous resources" to "Printed continuous resources on China serials

Number (ISSN)," add relevant examples;

--- Replace Chapter 8 "Metadata" with "China Standard Serial Numbers Metadata";

--- Replace 8.1 "ISSN metadata" with "China Standard Serial Number (ISSN) metadata";

--- Modify "8.2 metadata required for ISSN assignment" as "metadata required for the distribution of China Standard Serial Number (ISSN)";

--- Delete Chapter 10 "Expenses";

--- Replace "11 ISSN System Management" with "10 China Standard Serial Number (ISSN) System Management";

--- Replace Appendix B "Metadata" with "China Standard Serial Number (ISSN) Metadata". Delete B.1.1 and B.1.2, and re-

Drafting B.1 general rules. Tables B.1 and B.2 add header "data items", and add "CN number" data item in table B.1, table B.2

Added "CN number", "joint title", "sponsor", "publishing place", "competent authority", "publication period", "size" seven items;

--- Replace Appendix D "The Role and Responsibility of the ISSN Center" with "The Role and Responsibilities of the ISSN China National Center";

--- Delete D.3 "ISSN countries and/or regional centers";

--- Change Appendix E "ISSN and the role of ISSN (ISSN-L) in other identification and linking systems" to "EAN barcodes and

Relationship between China Standard Serial Numbers (ISSN)";

--- Delete E.1 general rules, E.2DOI, E.3OpenURL, E.4URN, and ISSN according to China's national conditions and practical applications.

E.5 SICI and ISSN;

--- Change E.6.1 "General" to E.1 "Overview", E.6.2 "Syntax and Specification" to E.2 "Syntax and Specification", E.6.3 "Use Case"

Change to E.3 "Use";

--- Add a reference. GB/T 3792.3-2009 Bibliography Part 3. Continuity Resources.

This part is proposed and managed by the National Standardization Technical Committee for Information and Documentation (SAC/TC4).

This section mainly drafted by. ISSN China National Center.

Introduction

The need for a short, unique, and clear identification code for serial publications and other continuous resources is an international consensus. Library, abstract

Service providers and other content users, suppliers, distributors and other intermediate agencies, publishers and other content providers urgently need a standard

Quasi code. Because no single letter is used by most serial producers and users, communication between different agencies is beyond

The country's borders require a numeric code. Therefore, the serial number of the international standard as a serial identification code

(ISSN) came into being.

The International Serial Data System (ISDS) is at the United Nations Educational, Scientific, and Technical Organization (UNESCO).

An intergovernmental organization established under the framework of the UNISIST project is the designated authority responsible for the distribution of ISSN..1993, ISDS

It evolved into the ISSN Network.

The ISSN China National Center is a designated regional agency of the ISSN International Center and is part of the International ISSN Center Network.

The ISSN China National Center was officially established in 1985 and is located in the National Library of China.

The first three editions of ISSN (ISO 3297) are limited to serial publications. In.2002, the library community

The concept of related resources in the serial publication category has been restructured,
