3 Terms and Definitions
4 Aluminum alloy
5 Corrosion-resistant steel
6 Nickel-based alloys
7 Titanium alloy

Foreword

This document is a standard or guiding technical document.

This document complies with the provisions of GB/T 1.1-2020 "Standardization Work Guidelines Part 1: Structure and Drafting Rules of Standardization Documents". Drafting.

This document is equivalent to ISO /T R12198.1998 "Materials for solid rivets in aerospace applications". The document type is a technical report from ISO.

The announcement has been adjusted to become a national standardization guiding technical document in my country. The following editorial changes have been made to this document.

---Rename this document to "List of Materials for Aerospace Solid Rivets" for easier use.

Some content in this document may involve patents. The issuing organization of this document assumes no responsibility for identifying patents.

1 Scope

This document provides a material list for solid rivets in different material series and under different minimum shear stress states. This document serves as a reference for product interchangeability.

2 Normative references

This document has no normative references.

3 Terms and Definitions

This document does not contain any terms or definitions that need to be defined.

4 Aluminum alloy

See Table 1. The brackets indicate previously used trademarks or other trademarks.
