Foreword

GB/Z 177.6-2026 is a national guiding technical document (GB/Z) of the People's Republic of China, issued on 27 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China.

It is under the responsibility of the Ministry of Industry and Information Technology (Electronics).

Classification: ICS 35.160; CCS L62.

1 Scope

Smart glasses are one of several categories of artificial intelligence terminal, and this document grades how intelligent they are. It is Part 6 of a series on intelligence grading of artificial intelligence terminals, and its subject is glasses. The guidance is issued in the GB/Z category, so it offers direction on grading and not mandatory requirements.

Manufacturers of smart glasses and augmented reality eyewear, component and software suppliers, and brands that want to describe their products in a consistent way can use a grading scheme to position their offerings. Test laboratories, retailers and consumers who wish to compare devices, as well as industry analysts, may also be interested. The document was issued on 27 August 2026 and sits under the Ministry of Industry and Information Technology in the electronics field, rather than the general national standardization administration alone. Readers who follow wearable devices and AI-enabled consumer electronics in China, or who plan to market such products there, can consult it for the national approach to grading intelligence in this category.
