Foreword

GB/Z 222-2026 is a national guiding technical document (GB/Z) of the People's Republic of China, issued on 27 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China.

It is under the responsibility of the Standardization Administration of China.

Classification: ICS 35.240.01; CCS L70.

1 Scope

Model as a Service (MaaS) gives users access to trained artificial intelligence models through a service interface, and this guiding technical document addresses the performance specification of such services. A shared way of describing and specifying performance helps providers and customers talk about the same things when services are offered, bought or compared.

Cloud and AI platform operators, model developers, system integrators, procurement teams and evaluation laboratories are the natural readers. It can serve as a reference when preparing service descriptions, tender documents or internal benchmarks for model services.

Because it is a GB/Z document, it supplies guidance and a technical reference rather than compulsory requirements, and adoption is voluntary. Organisations working in the Chinese market can use it to align terminology and expectations with a national reference point. It was issued on 27 August 2026 by the Standardization Administration of China.
