Foreword

GB/Z 226-2026 is a national guiding technical document (GB/Z) of the People's Republic of China, issued on 27 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China.

It is under the responsibility of the Standardization Administration of China.

Classification: ICS 35.240.01; CCS L70.

1 Scope

Where an architecture describes what a Model as a Service platform is made of, a technical framework describes how it is organized to work, and this guiding document addresses the latter. It covers the technical framework for Model as a Service (MaaS) in the field of artificial intelligence. Issued as a GB/Z document, it gives guidance for practitioners and does not set mandatory requirements.

It is relevant to companies that operate model-serving platforms, to engineering teams that build the underlying technical components, and to enterprise users and integrators who must understand how a MaaS offering is structured before adopting it. Technical reviewers and procurement teams can also use it as a point of comparison when assessing vendor proposals. The document was issued on 27 August 2026 by the national standardization administration, together with a related reference architecture document for the same subject. Readers following the development of China's AI service ecosystem, or preparing to deploy or sell model services in the Chinese market, may find it informative as a statement of national guidance.
