Foreword

GB/Z 256-2026 is a national guiding technical document (GB/Z) of the People's Republic of China, issued on 27 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China.

It is under the responsibility of the Standardization Administration of China.

Classification: ICS 03.080.99; CCS A20.

1 Scope

Guidance on how to carry out credit evaluation of industrial parks is provided in this guiding technical document. Industrial parks concentrate many enterprises in one managed area, and a structured way of assessing their credit standing is of interest to park management bodies, local governments, financial institutions, rating and evaluation agencies and the companies that locate there. As a GB/Z document it offers implementation guidance rather than mandatory requirements, so organisations may adopt it voluntarily when designing or operating an evaluation scheme. It was issued on 27 August 2026 by the Standardization Administration of China. Readers wanting to align a park credit assessment practice with a national reference, or to understand how Chinese authorities frame the topic, can use it as a starting point alongside any local rules that apply to their park.
