Annex B (normative) Control scheme for the main pests and diseases of winter jujube ...	21

Foreword

Appendix A and Appendix B to this Guidance Document are normative appendices. The guidance of technical documents proposed by the General Administration of Quality Supervision, Inspection and Quarantine. The guidance of technical documents by the China National Institute of Standardization. The guiding technical document drafting unit. Plant Protection Station in Binzhou City, Shandong Plant Protection Station, People's Republic of China Shandong Exit Inspection and Quarantine Quarantine Bureau, Dongying Estuary Plant Protection Station, Wudi County Plant Protection Station. The main drafters of this

technical document Liu Junzhan, Li Mingli, Zhang Hongbing, Liu Huaihai, Song Shu'e, Sun Jie, Zhang Xiu'an, Liu Jingtao. Dongzao production technical specifications

1 Scope

This guiding technical document specifies the basic requirements for the production of winter jujube, covering mainly the selection and management of the production base, the management of production inputs, cultivation management, pest control, labour protection, batch management and record keeping. This guiding technical document applies to the production of winter jujube.

This guidance specifies the basic technical requirements of winter jujube production, including the selection and management of production bases, production inputs Management, cultivation and management, pest control, labor protection, batch management, archival records and so on. This guideline is applicable to the production of jujube.

2 Normative references

The following documents contain provisions which, through reference in this Guidance Document, become the provisions of this Guidance Note document. All dated Reference documents, all subsequent amendments (not including errata content), or revisions do not apply to this guidance document, however, drums Recipients of the agreement based on this guidance document are encouraged to study whether the latest versions of these documents are applicable. All undated references The latest version of this document applies to this guidance document.

GB/T 8321 (all parts) Guidelines for the rational use of pesticides

GB/T 18407.2 Safety of agricultural products Environmental pollution-free fruit origin requirements

3 Terms and definitions

The following terms and definitions apply to this guidance document.

- 3.1 Jujube vegetativeshoot The formation of crown skeleton of the growth of branches.
- 3.2 Jujube hanging bearingbranch With jujube flowers, fruit branches.
- 3.3 Jujube stockbaseshoot Jujube hanging short branches.
- 3.4 Results base branch secondarytress With jujube shares branches.
- 3.5 Girdle bandgirdle Ring bark or trunk cut to the appropriate width of the bark, phloem.

4 Production base selection and management

4.1 production base selection Environmental conditions of production base in line with the requirements of GB/T 18407.2, and fill in the "basic record of production base" (see Table A.1) and Record of Surveys of Existing Species in Production Sites (See Table A.2). Should choose flat topography, irrigation and drainage convenience, deep soil, loose soil fertilizer Wo, physical and chemical properties of good loam plots. The production base should be far away from pollution sources. Contiguous area should be more than 3hm².
