Foreword

This document is in accordance with GB/T 1.1-2020 "Guidelines for Standardization Part 1. Structure and Drafting Rules of Standardization Documents". To be drafted. Please note that some of the contents of this document may involve patents. The issuing agency of this document is not responsible for identifying patents. This document was proposed by the State Administration of Traditional Chinese Medicine. This document is under the jurisdiction of the National Standardization Technical Committee of Traditional Chinese Medicine (SAC/TC478). This document was drafted by: Wuhan Hospital of Integrated Traditional Chinese and Western Medicine, Chinese Association of Chinese Medicine, Second Affiliated Hospital of Hunan University of Traditional Chinese Medicine, Jiangxi Chinese Medicine The Second Affiliated Hospital of Medical University, Shenyang Hospital of Integrated Traditional Chinese and Western Medicine, Beijing Hospital of Traditional Chinese Medicine Affiliated to Capital Medical University, Guangdong Provincial Hospital of Traditional Chinese Medicine. The main drafters of this document. Duan Yiqun, Li Kai, Zhou Xiaoyong, Su Xiangfei, Yang Zhibo, Liu Qiao, Fan Ruiqiang, Chen Qingyan, Zhou Dongmei. Traditional Chinese Medicine Technical Code of Practice

1 Scope

GB/Z 40667-2021 is the Chinese national standard on specification for operation technologies of traditional chinese medicinedermatologyion atomization of chinese materia medica, in the field of health care technology. The /Z suffix marks it as a guiding technical document: it does not prescribe requirements that can be certified against, but sets out the technique, the method or the state of the art that the standards bodies recommend following. It was issued on 11 October 2021 by the State Administration for Market Regulation; Standardization Administration of China. As a guiding technical document it carries no separate date of entry into force: it applies from publication. Classification: ICS 11.020, CCS C04. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the

issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This document stipulates the preparation, operation steps, precautions and contraindications before the operation of traditional Chinese medicine ion spray. This document is applicable to the operation of traditional Chinese medicine ion spray technology.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 IonatomizationofChinesemateriamedica The gauze that has been soaked in Chinese medicine liquid is applied to the affected area, and the fine particles formed by the ultrasonic spectrum oscillation generated by the ion sprayer Or ionized steam for external treatment.

3.2 Coldspray The fine particles formed by the oscillation of the ultrasonic frequency spectrum generated by the ion spray machine are atomized for treatment.

Note. It is necessary to apply gauze soaked in traditional Chinese medicine liquid to the affected area for spray treatment.

3.3 Thermalspray The ionized steam produced by the ion spray machine is used for treatment.

Note. It is necessary to apply gauze soaked in traditional Chinese medicine liquid to the affected area for spray treatment.

3.4 PhysicliquorofChinesemateriamedica It is a liquid dosage form for decoction of medicinal materials or rough ends with water, removing slag and extracting juice.

4 Preparation before operation

4.1 Therapeutic equipment and supplies The treatment equipment and supplies at least include ion sprayer, traditional Chinese medicine liquid, gauze, dry cotton ball, disposable treatment sheet, and water cup.

4.2 Gauze treatment The yarn is placed in the configured Chinese medicine liquid and soaked for 2 hours.

5 Operation method

5.1 Check the patient's name and explain the purpose of treatment to the patient.
