What this standard covers

This standard specifies requirements for occupational disease hazard identification, protective measures, emergency measures, workplace heating and ventilation, daylighting and lighting, auxiliary rooms, sanitation facilities, occupational health monitoring management, and assessment of occupational disease prevention and control work in pressurized water reactor nuclear power plants. This standard is applicable to the prevention and control of occupational disease hazards in the operation stage of PWR nuclear power plants, but not applicable to the prevention and control of occupational disease hazards in the decommissioning stage of nuclear power plants. The prevention and control of occupational disease hazards in nuclear power plants of other reactor types can be implemented as a reference.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): C57.

Estimated length of the Chinese original: 24,225 words.
