9.4 Detection and control of pests and diseases

1 Foreword

GH/T 1135-2024 was issued by All-China Federation of Supply and Marketing Cooperatives on 29 October 2024 and has been in force since 1 May 2025.

It replaces the earlier edition GH/T 1135-2017.

The GH/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard applies to agricultural products rich in selenium that are naturally enriched in the growing environment or produced through bio-nutrition fortification technology. This standard does not apply to agricultural products obtained by artificially adding selenium after harvesting, slaughtering or fishing.

GH/T 1135-2024 falls under ICS 65.020, in the field of agriculture.

This catalogue holds 78 other GH/T standards in that field.

In this catalogue, GH/T standards carry edition years from 1998 to 2026.

3 About this standard

Sector: Supply and Marketing Cooperatives Industry Standard (Recommended)

Issued by: All-China Federation of Supply and Marketing Cooperatives

English translation: about 15 pages (approximate)
