Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

Please note that some content of this document may be patented. The issuing agency of this document assumes no responsibility for identifying patents.

Introduction

With the steady progress of the cotton quality inspection system reform plan, in the face of the relatively broad cotton market at home and abroad, the cotton packaging material industry it has developed rapidly, but there are many problems in the rapid development of cotton packaging material processing enterprises.

In the market competition, they have to rely on quantity to win on the premise of ensuring product quality; small enterprises have no R&D experience and do not understand packaging performance.

Disregarding quality, shoddy, and relying on price to win Flower logistics caused adverse effects.

This document formulates the evaluation criteria for the quality of cotton packaging material processing enterprises in my country, and fundamentally improves the enterprise performance evaluation mechanism.

The development of enterprise quality management has a guiding role, which can effectively measure the quality level and quality management ability of the enterprise, and let the enterprise understand the difference between similar enterprises.

Or what gaps exist compared with benchmarking companies, and clarify the direction of follow-up improvement to further improve product quality and promote the healthy development of the industry.

It is of great significance to create brand cotton packaging materials and go to the international market.

Specification for quality evaluation of cotton packaging material processing enterprises

1 Scope

This document specifies the evaluation principles, evaluation indicators, evaluation methods, evaluation grades and Specific methods for evaluating procedures and requirements.

This document is applicable to cotton packaging material processing enterprises (hereinafter referred to as "processing enterprises") by government departments, industry associations and third-party evaluation agencies.

Industry") quality evaluation can also be used for the self-evaluation of processing enterprises.

2 Normative references
