1 Foreword

GH/T 1394-2022 was issued by All-China Federation of Supply and Marketing Cooperatives on 9 February 2023 and has been in force since 1 March 2023.

The GH/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the liquid chromatography-mass spectrometry/mass spectrometry method for the determination of oligosaccharides in honey. This standard is applicable to the determination and determination of endogenous and exogenous oligosaccharides in honey. The oligosaccharides referred to in this standard are maltoheptaose and maltoheptaose.

GH/T 1394-2022 falls under ICS 67.180.10, in the field of food technology.

This catalogue holds 209 other GH/T standards in that field.

In this catalogue, GH/T standards carry edition years from 1998 to 2026.

3 About this standard

Sector: Supply and Marketing Cooperatives Industry Standard (Recommended)

Issued by: All-China Federation of Supply and Marketing Cooperatives

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

YY/T 0681.18-2020 - Test methods for sterile medical device package - Part 18: Nondestructive detection of leaks in packages by vacuum decay method

GB/T 317-2018 - White granulated sugar

GH/T 18796-2012 - Honey

GH/T 1398-2022 - Determination of flavor volatile substances in lavender honey-Gas chromatography mass spectrometry

GH/T 1395-2022 - Determination of matrine and oxymatrine in Honey - Liquid chromatography-tandem mass spectrometry method

GH/T 1393-2022 - Determination of psicose in Honey - High performance liquid chromatography method

5 Classification and status

International classification (ICS): 67.180.10

Chinese Standard Classification (CCS): X 31

Prefix GH/T: recommended standard.
