1 Foreword

GH/T 1396-2022 was issued by All-China Federation of Supply and Marketing Cooperatives on 9 February 2023 and has been in force since 1 March 2023.

The GH/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies a real-time fluorescence PCR detection method for the detection of pine source components in pine pollen and its products. This standard is applicable to the qualitative detection of pine source components in pine pollen and its products. The limit of detection (LOD) of this standard is 1% (mass fraction).

GH/T 1396-2022 falls under ICS 67.050, in the field of food technology.

This catalogue holds 209 other GH/T standards in that field.

In this catalogue, GH/T standards carry edition years from 1998 to 2026.

3 About this standard

Sector: Supply and Marketing Cooperatives Industry Standard (Recommended)

Issued by: All-China Federation of Supply and Marketing Cooperatives

English translation: about 15 pages (approximate)

4 Related standards

Standards on related subjects:

YC/T 159-2019 - Tobacco and tobacco products - Determination of water soluble sugars - Continuous flow method

YC/T 405.5-2011 - Tobacco and tobacco products - Determination of multi-pesticide residues - Part 5: Determination of maleic hydrazide residue - High performance liquid chromatography method

5 Classification and status

International classification (ICS): 67.050

Chinese Standard Classification (CCS): X 89

Prefix GH/T: recommended standard.
