1 Foreword

GM/T 0126-2023 was issued by State Administration of Cryptography on 4 December 2023 and has been in force since 1 June 2024.

The GM/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 11 pages in English translation.

2 Scope Preview

This document defines the interaction process, the format and parsing process and web page security requirements of HTML cryptographic tags. This document is applicable to the browser's handling of web page cryptographic tags.

GM/T 0126-2023 carries no ICS number and no Chinese Standard Classification code.

This catalogue holds 160 other GM/T standards.

Of the 108 GM/T standards that do carry an ICS number, 106 (98%) fall under ICS 35, in the field of information technology.

3 Normative references

GB/T 18792-2002 - Information technology - Document description and processing languages - Hyper Text Markup Language (HTML)

4 About this standard

Issued by: State Administration of Cryptography

English translation: about 11 pages

Chinese original: about 17,134 characters

5 Related standards

Standards on related subjects:

GM/T 0133-2024 - Requirements for the application of cryptography in critical information infrastructure

GM/T 0135-2024 - Multi-party secure computing technology framework
