What this standard covers

This standard specifies the general requirements, subsystem operation and maintenance requirements, and procedural requirements for the operation and maintenance of satellite digital broadcasting and television earth stations (hereinafter referred to as "earth stations"). It applies to the operation and maintenance of fixed-service broadcasting and television earth stations transmitting video, audio, and data in C-band and Ku-band.

Document data

Estimated length of the Chinese original: 25,227 words.

Supersedes the earlier edition GY/T 182-2002.
