1 Foreword

HAD 00209-2023 was issued by State Nuclear Safety Administration on 28 April 2023 and took effect the same day.

2 Scope

This standard applies to the emergency preparedness and emergency response of the operator of radioactive waste near-surface disposal facilities during the site selection, design, construction and operation stages, as well as the supervision and management of the emergency preparedness and emergency response of the operator by the nuclear safety regulatory department of the State Council. Specific requirements for emergency preparedness and emergency response for operators of radioactive waste near-surface disposal facilities at different stages. It can be used as a reference for emergency-related work on very low-level radioactive waste landfills.

3 About this standard

Issued by: State Nuclear Safety Administration

English translation: about 14 pages

Chinese original: about 21,270 characters

4 Classification and status

Prefix HAD: nuclear safety guide.
