What this standard covers

This standard specifies the transmissive, reflective, depending on the mirror glass level gauge series of standard type, the maximum allowable working pressure under temperature levels, technical requirements and labeling methods. The standard common in the chemical industry, nominal pressure of 0. 0 ~ 0. 1MPa pressure vessel and pressure vessel 0. 6, 2. 5, 4. 0, 6. 3 MPa, temperature of the glass level gauge for level indication equipment 0 ~ 250°, the series of criteria in Table 1. 0. 2.

Document data

International classification (ICS): 71.12.

Chinese classification (CCS): G91.

Estimated length of the Chinese original: 8,864 words.
