

HG

**CHEMICAL INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

HG/T 20546-2009

Replacing HG/T 20546-1992

Design Specification of Equipment Layout for Chemical Plant

化工装置设备布置设计规定

(English Translation)

Issued on: December 4, 2009

Implemented on: June 1, 2010

Issued by: Ministry of Industry and Information Technology

Table of Contents

Foreword

HG/T 20546.1-2009 Design specification of equipment layout for chemical plant - Part 1:
Requirements for content and depth

- 1 General provisions
- 2 Composition and brief description of design product documents
 - 2.1 Composition of design product documents
 - 2.2 Brief description of design product documents
- 3 Preparation of equipment layout drawings at each stage
 - 3.1 Equipment layout drawings for basic engineering design
 - 3.2 Equipment layout drawings for detailed engineering design
- 4 Drafting requirements for equipment layout drawings
 - 4.1 General requirements
 - 4.2 Drafting basis and requirements
 - 4.3 Drawing arrangement and view requirements
 - 4.4 Content shown and dimensioning method
 - 4.5 Notes on the drawing
 - 4.6 Revision block
- 5 Requirements for line widths
- 6 Legend and simplified representation for equipment layout drawings
- 7 Common abbreviations used in equipment layout drawings

Addition: Explanation of provisions

HG/T 20546.2-2009 Design specification of equipment layout for chemical plant - Part 2:
Design engineering requirements

- 1 General provisions
- 2 Key points of layout
 - 2.1 Requirements of process and flow
 - 2.2 Requirements of environmental protection, fire prevention, explosion prevention, labour safety and health, and occupational safety and health
 - 2.3 Ease of operation
 - 2.4 Ease of installation and maintenance
 - 2.5 Requirements of economy and rationality
- 3 Clearances, headroom and relevant elevations
 - 3.1 Minimum clearances between equipment

3.2 Recommended headroom or vertical distances

3.3 Elevations

3.4 Recommended widths of roads and operating passages

4 Operating platforms and ladders

4.1 Operating platforms

4.2 Ladders

5 Other requirements for layout design

5.1 Height of vent outlets

5.2 Piping

5.3 Pipe trenches and sewage manholes

5.4 Drain pipes and sewers

5.5 Paved ground and slopes

Addition: Explanation of provisions

HG/T 20546.3-2009 Design specification of equipment layout for chemical plant - Part 3:
Requirements for professional technical management

1 General provisions

2 Scope of responsibilities of the equipment layout discipline and its tasks at each stage

2.1 Scope of responsibilities

2.2 Tasks at each stage of engineering design

3 Working procedure of the equipment layout discipline in the engineering design stage

4 Design conditions of the equipment layout discipline (summary)

4.1 "Preliminary edition" equipment layout drawing stage

4.2 "Confirmed edition" equipment layout drawing stage

4.3 "Design edition" equipment layout drawing stage

4.4 "Construction edition" equipment layout drawing stage

5 Design quality assurance measures of the equipment layout discipline

5.1 Design conditions

5.2 Engineering requirements

5.3 Design documents at each stage

5.4 Others

5.5 Requirements for signing of conditions

6 Design checking and review outline of the equipment layout discipline

6.1 Checking and review principles

6.2 Checking and review methods

6.3 Checking and review outline

6.4 Responsibilities of the checker

6.5 Responsibilities of the reviewer

Addition: Explanation of provisions

HG/T 20546.4-2009 Design specification of equipment layout for chemical plant - Part 4:
Conditions to be provided

1 General provisions

2 Equipment layout condition drawings at each stage (edition)

3 Equipment foundation conditions

3.1 Data and conditions on which they are based

3.2 Content and depth of equipment foundation conditions

4 Equipment support conditions on floors and platforms

4.1 Data on which they are based

4.2 Content and depth of equipment support conditions on floors and platforms

5 Equipment load conditions

5.1 Data on which they are based

5.2 Content and depth of equipment load conditions

6 Platform conditions

6.1 Data and conditions on which they are based

6.2 Content and depth of platform conditions on floors

6.3 Content and depth of platform conditions on the ground

6.4 Content and depth of platform conditions on equipment

7 Conditions for equipment openings in floor slabs

7.1 Data and conditions on which they are based

7.2 Content and depth of conditions for equipment openings in floor slabs

8 Conditions for ground paving, pits and trenches

8.1 Data and conditions on which they are based

8.2 Content and depth of conditions for ground paving, pits and trenches

9 Local lighting

9.1 Data on which it is based

9.2 Content and depth of local lighting conditions

Addition: Explanation of provisions

HG/T 20546.5-2009 Design specification of equipment layout for chemical plant - Part 5:
Design technical requirements

1 General provisions

2 Layout of pumps

2.1 Layout principles

2.2	General requirements
2.3	Layout examples
3	Layout of towers
3.1	Layout principles
3.2	General requirements
3.3	Layout examples
4	Layout of heat exchangers
4.1	Layout principles
4.2	General requirements
4.3	Layout examples
5	Layout of air coolers
5.1	Layout principles
5.2	General requirements
5.3	Layout examples
6	Layout of horizontal vessels
6.1	Layout principles
6.2	General requirements
6.3	Layout examples
7	Layout of vertical vessels and reactors
7.1	Layout principles
7.2	General requirements
7.3	Layout examples
8	Layout of fired heaters
8.1	Layout principles
8.2	General requirements
8.3	Layout examples
9	Layout of centrifugal compressors
9.1	Layout principles
9.2	General requirements
9.3	Layout examples
10	Layout of reciprocating compressors
10.1	Layout principles
10.2	General requirements
10.3	Layout examples
11	Layout of pipe racks within the plant
