### What this standard covers

This standard applies to large, basic engineering design of powder material handling medium-sized chemical companies new or expansion projects, crushing, screening, storage and packaging systems (preliminary design) and detailed engineering (construction plans) phase of the machine Staff transportation process design, process design mechanical conveying powder materials of small chemical companies and other industries of construction projects may also refer to use.

### Document data

International classification (ICS): 71.12.

Chinese classification (CCS): G90.

Estimated length of the Chinese original: 47,417 words.
