What this standard covers

This standard specifies the ammonia single tube and flow manufacturing, inspection and acceptance requirements. This standard applies to the design pressure of not more than 1.8 MPa, the design humidity less than 550 °C of DN 600mm, DN 800mm and DN 1000mm ammonia synthesis tower (hereinafter referred to as the inner parts).

Document data

International classification (ICS): 71.12.

Chinese classification (CCS): G93.

Estimated length of the Chinese original: 6,667 words.
