What this standard covers

This standard specifies the transmission system is a combination of agitation, selection and technical requirements. This standard applies to the design pressure of the design pressure PN-0. 1 ~ 1. 6Mpa (-1 ~ 16bar), stirred vessel design temperature -20 ~ +300°C (eg reactor) stirring gear, used to achieve mixing function.

Document data

International classification (ICS): 71.12.

Chinese classification (CCS): G92.

Estimated length of the Chinese original: 25,258 words.
