What this standard covers

This standard specifies the nominal polypropylene/glass f Steel (PP/FRP) composite pipes and pipe fittings, nominal diameter, size and dimensions, connecting structure, technical conditions, testing, labeling, packaging, transportation, storage. This standard applies to polypropylene tubes (hereinafter referred to as PP tube) lined outer fabric wrapped fiberglass reinforced plastic or fiberglass reinforcement layer (hereinafter referred to as FRP) composite pipes and pipe fittings. Polypropylene tubes using the same medium range, mainly for transporting acid, alkali, salt and other corrosive media can also be used to transport drinking water.

Document data

International classification (ICS): 71.12.

Chinese classification (CCS): G93.

Estimated length of the Chinese original: 45,494 words.
