What this standard covers

This standard specifies the technical requirements and test methods for dynamic simulation tests of open circulating cooling water. This document is applicable to small-scale dynamic simulation tests of metal material interlayer heat exchange equipment in open circulating cooling water systems in laboratories, and is also applicable to medium-sized dynamic simulation tests and small-scale dynamic simulation tests for field verification and evaluation of the performance of circulating water treatment agents.

Document data

International classification (ICS): 71.040.01.

Chinese classification (CCS): G76.

Estimated length of the Chinese original: 21,245 words.
