What this standard covers

This standard specifies the steel mechanical stirring vessel (hereinafter referred to as mixing container) technical requirements, test methods, inspection rules, marking, packaging, storage and transportation requirements. This standard applies to satisfy GB 150, JB/T 4735 requirements, and meet HG/T 3109 requires the mixing container. Its technical process is the mixing of liquid as the main medium (also may be associated with gas and solid phase medium), for a variety of physical and chemical processes of steel mechanical agitation vessel. A typical combination of container and the mixing device types include: top-in, oblique style, bottom -in, side- and so on.

Document data

International classification (ICS): 71.120.10; 75.180.20; 23.020.30.

Chinese classification (CCS): G93.

Estimated length of the Chinese original: 13,158 words.

Supersedes the earlier edition HG/T 2268-1992.
