

HG

CHEMICAL INDUSTRY STANDARD OF THE PEOPLE'S REPUBLIC OF CHINA

HG/T 22815-2016

Code for design of drilling solution mining in chemical mines

化工矿山钻井水溶法采矿设计规范

(English Translation)

Issued on: October 22, 2016

Implemented on: April 1, 2017

**Issued by: Ministry of Industry and Information Technology of the
People's Republic of China**

Table of Contents

1 Scope

1 Scope

This standard specifies the technical requirements for geological data, mining scope and scale, mining methods, mining processes, drilling engineering, collection brine engineering, mine transportation engineering, mine safety and environmental protection in chemical mine drilling water-soluble mining design.

Foreword

This document was issued on 22 October 2016 by the Ministry of Industry and Information Technology of the People's Republic of China, and has been in force since 1 April 2017.

It is the first edition of this standard.

The document is under the responsibility of the Ministry of Industry and Information Technology.

About this edition

HG/T 22815-2016 is the first edition of this standard. It was issued on 22 October 2016 and has been in force since 1 April 2017.

There is no earlier edition to compare it with, so a specification that has to refer to this subject can only cite HG/T 22815-2016 itself.

The interval between issue and effect is the transition period. It exists so that producers, laboratories and buyers can requalify products, revise procedures and use up documentation before the new text becomes the one that applies. The date on this page is the official one announced by the Ministry of Industry and Information Technology of the People's Republic of China.

Edition history and citation

HG/T 22815-2016 is a first edition: there is no earlier version of this standard, so a document that needs to refer to this subject can only cite HG/T 22815-2016 itself.

Where an edition is replaced, the Chinese standardization system keeps the number and changes the year: the number identifies the subject, the year identifies the text. That is why a citation without a year is ambiguous and a citation with one is not.

Classification and status

HG/T 22815-2016 carries no ICS number in the official record.

The HG/T prefix marks a recommended standard of China's chemical industry, issued by the Ministry of Industry and Information Technology. It is not, in itself, law: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document is under the responsibility of the Ministry of Industry and Information Technology, which is the body that maintains it and that will answer a formal question about its interpretation.

How this standard is designated

The full designation is HG/T 22815-2016. A citation should carry the number with its year, because the year identifies the text that applies.
