What this standard covers

This standard specifies the method for measuring the magnetic slurry filtration accuracy. This standard includes initial accuracy test and maximum size of the particles through testing. Also provides a method of determining cleanliness of the filter itself. This standard applies to magnetic materials industry magnetic slurry filtered through filter. Also applicable to other liquid filtration element.

Document data

International classification (ICS): 35.220.01.

Chinese classification (CCS): G83.

Estimated length of the Chinese original: 8,834 words.
