What this standard covers

This standard specifies the requirements of industrial activity precipitated calcium carbonate, test methods, inspection rules, marking, labeling, packaging, transportation and storage. This standard applies to the use of dry or wet on the surface activation treatment precipitated calcium carbonate production of industrial activity precipitated calcium carbonate. The product is mainly used for plastic, rubber, resins and other industrial organic fillers. MF: CaCO Relative molecular weight: 100. 09 (according to 2001 international relative atomic mass).

Document data

International classification (ICS): 71.060.50.

Chinese classification (CCS): G12.

Estimated length of the Chinese original: 10,194 words.

Supersedes the earlier edition HG/T 2567-1994.
