Foreword

HG/T 2573-2026 is a recommended industry standard of the People's Republic of China in the Chemical Industry sector, approved and issued by the Ministry of Industry and Information Technology on 15 July 2026, with effect from 1 February 2027.

This edition replaces HG/T 2573-2012.

It is administered by the National Technical Committee for Chemical Standardization, Inorganic Chemicals Subcommittee.

Classification: ICS 71.060.20; CCS G13.

1 Scope

HG/T 2573-2026 is the Chinese chemical industry standard for magnesium oxide for industrial use. It sets out the technical provisions that apply to this inorganic chemical when it is produced and supplied for industrial purposes, so that producers and buyers can describe, test and accept the material on the same basis. The English translation gives the full text of these provisions as they appear in the Chinese original.

The document is relevant to manufacturers of magnesium oxide, quality control and test laboratories, and purchasers who write the product into supply contracts. It carries the /T suffix and is therefore a voluntary industry standard, although it is often referred to in commercial agreements. It was approved by the Ministry of Industry and Information Technology on 15 July 2026 and takes effect on 1 February 2027. On that date it replaces HG/T 2573-2012.
