Determination of Linear Shrinkage Rate of Epoxy Casting Resin

环氧浇铸树脂线性收缩率的测定

(English Translation)

Issued on: April 13, 1994

Implemented on: January 1, 1995

Issued by: MIIT

What this standard covers

This standard specifies the method for determination of epoxy casting resin shrinkage in the linear part of the curing process. This standard applies to the epoxy resin as a substrate consisting of casting, which indicates that the measured values ??for other size and shape of the mold shrinkage characteristics is useful.

Document data

International classification (ICS): 83.04.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 5,521 words.

Adopted international standard: ASTM D2566, NEQ.
