What this standard covers

This standard specifies the method for the determination of cellulose acetate in a solvent mixture of dichloromethane and drunk in the dilute solution viscosity number and viscosity ratio. It is suitable for acid value of not less than 50% of the cellulose acetate.

Document data

International classification (ICS): 71.040.40.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 6,626 words.

Adopted international standard: ISO 1157-1990, IDT.

Supersedes the earlier edition GB 8326-1987.
