1 Scope

1 Scope

This standard specifies a test method for comparative evaluation of footwear with set performance through human trials after the shoemaker has changed the craftsmanship, material, model, structure, etc. of the shoe. This standard specifies terms and definitions, fitting categories, selection of subjects, and evaluation procedures for functional and durability tests of test shoes. This standard applies to all types of shoes, boots, etc., and is used to verify the impact of changes in shoemaking processes, materials, models, structures, etc. on the functionality and durability of shoes.
