What this standard covers

This standard applies to dried processed photographic film emulsion surface or film base surface anti-scratch ability evaluation. He provides the experience under controlled conditions based on laboratory tests. He may not be able to predict the film in any particular industrial machinery actual scratch resistance.

Document data

International classification (ICS): 37.040.20; 37.060.20; 71.040.50.

Chinese classification (CCS): G80.

Estimated length of the Chinese original: 9,966 words.

Adopted international standard: ANSI PH1.37-1977 (1983), IDT.

Supersedes the earlier edition HG/T 3010-1990.
