What this standard covers

This standard specifies the principle, structure, requirements, test methods, inspection rules, marking, packaging, transportation, storage, and accompanying documents for a tensile stress relaxation apparatus for vulcanized rubber. This document applies to tensile stress relaxation apparatuses used for determining the tensile stress relaxation properties of vulcanized rubber at both room and high temperatures.

Document data

International classification (ICS): 71.120; 83.200.

Chinese classification (CCS): G12.

Estimated length of the Chinese original: 12,133 words.

Supersedes the earlier edition HG/T 3243-2005.
