Foreword

HG/T 5367.7-2026 is a recommended industry standard of the People's Republic of China in the Chemical Industry sector, approved and issued by the Ministry of Industry and Information Technology on 15 July 2026, with effect from 1 February 2027.

It is administered by the National Technical Committee for Paint and Pigment Standardization.

Classification: ICS 87.040; CCS G51.

1 Scope

HG/T 5367.7-2026 is Part 7 of the Chinese chemical industry series on coatings for rail transit vehicles and deals with easy-cleaning coatings. It sets out the technical provisions for this type of coating when it is used on rail transit vehicles, so that coating suppliers and vehicle makers share a single reference. The English translation reproduces the complete Chinese text of this part.

The part is useful to producers of easy-cleaning coatings, rolling stock manufacturers and maintenance workshops that specify or apply such coatings, and to laboratories that test them for acceptance. The /T in the code shows that it is a voluntary industry standard. It was approved by the Ministry of Industry and Information Technology on 15 July 2026 and takes effect on 1 February 2027. It does not replace an earlier edition and is read together with the other parts of the series on coatings for rail transit vehicles.
