What this standard covers

This standard specifies the light stabilizer poly{[6-[(1,1,3,3-tetramethylbutyl)amino]-1,3,5-triazine-2,4-bis][(2,2,6,6-tetramethyl-piperidiny)imino]-1,6-hexadiene[(2,2,6,6-tetramethyl-4-piperidiny)imino]} (referred to as light stabilizer 944) technical requirements such as physical and chemical properties, stipulates the batching rules, sampling, and test methods of the product, and specifies the content of marking, packaging, transportation, and storage. This standard applies to the inspection of light stabilizer 944, which is produced by the reaction of cyanuric chloride, tert-octylamine and piperidine hexamethylenediamine under the action of a catalyst, and is obtained after post-treatment.
