1 Scope

1 Scope

This standard specifies the evaluation principles, evaluation indicators and requirements, evaluation procedures and evaluation reports for green factories in the polycaprolactam (PA6) industry. The evaluation index system for green factories in the polyurethane resin industry includes basic requirements and general requirements. The general requirements include infrastructure, management systems, energy and resource inputs, products, environmental emissions, and performance requirements. The specific evaluation indicators are divided into mandatory requirements and optional requirements. The mandatory requirements are the basic requirements that the green factory must meet, and the optional requirements are the improvement requirements of the green factory. satisfaction of requirements.
