What this standard covers

This standard specifies the technical requirements for the appearance, colorimetry, solid content, etc. of isocyanate-modified epoxy resins for copper clad laminates, describes the corresponding sampling and test methods, specifies the inspection rules and marking, packaging, transportation and storage, and provides product classifications that facilitate technical regulations. This standard applies to isocyanate-modified epoxy resins for copper clad laminates made by the reaction of bisphenol A epoxy resins and isocyanate resins. It can be used as a reference in the manufacture of copper clad laminates for printed circuits, electronic insulation materials, and other fields.

Document data

International classification (ICS): 83.080.10.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 11,197 words.
