What this standard covers

This standard specifies the requirements, test methods, inspection rules, marking, packaging, transportation and storage of organic composite polyaluminum chloride for water treatment agents. This standard applies to organic composite polyaluminum chloride products composed of polydimethyldiallylammonium chloride and polyaluminum chloride. This product is mainly used for coagulation and sedimentation, removal of organic matter and color, and phosphorus removal of industrial water supply, wastewater and sewage with a turbidity of not less than 300NTU, and is also suitable for sludge dehydration.

Document data

International classification (ICS): 71.100.80.

Chinese classification (CCS): G77.
