What this standard covers

This standard specifies the terms and definitions, equipment composition, requirements, inspection methods, and inspection rules for electron accelerators used in tire irradiation. This standard applies to electron accelerators used in tire irradiation for irradiating pre-vulcanized tire cord layers or transition layers.

Document data

International classification (ICS): 71.120, 83.200.

Chinese classification (CCS): G95.

Estimated length of the Chinese original: 21,260 words.
