What this standard covers

This standard specifies the requirements, test methods, inspection rules, marking, packaging, transportation, and storage for fulvic acid-based water-soluble fertilizers containing macronutrients. This standard applies to the product research and development, manufacturing, testing, and evaluation of water-soluble fertilizers containing macronutrients made primarily from mineral-derived fulvic acid, nitrogen, phosphorus, and potassium through specific processing techniques.

Document data

International classification (ICS): 65.080.

Chinese classification (CCS): G21.

Estimated length of the Chinese original: 9,929 words.
