What this standard covers

This standard specifies the determination methods for the pH adjustment performance, film-forming performance, deoxygenation performance, and corrosion inhibition performance of polyamine boiler water treatment agents. This standard applies to the performance determination of polyamine boiler water treatment agents added to boilers with superheated steam pressure not exceeding 16.7MPa.

Document data

International classification (ICS): 71.040.40.

Chinese classification (CCS): G76.

Estimated length of the Chinese original: 9,961 words.
