What this standard covers

This standard specifies the method for determining the scale inhibition performance of scale inhibitors in high-temperature water systems using the particle size distribution method. This standard applies to the determination of scale inhibition performance and formulation screening tests of scale inhibitors used in hot water boiler systems with rated outlet water temperatures of 80 to 180°C.

Document data

International classification (ICS): 13.060.25; 71.040.40.

Chinese classification (CCS): G76.
