What this standard covers

This standard specifies the general structural formula and naming conventions, technical requirements, test methods, inspection rules, marking, packaging, transportation, and storage for allyl alcohol polyoxyethylene polyoxypropylene ethers. This document applies to products obtained by the ring-opening addition reaction of ethylene oxide and propylene oxide with allyl alcohol as the initiator under the action of a catalyst. These products are widely used in the polyurethane foam levelers, textile auxiliaries, defoamers, emulsifiers, and other industries.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): G77.

Estimated length of the Chinese original: 12,198 words.
