Foreword

HG/T 6526-2026 is a recommended industry standard of the People's Republic of China in the Chemical Industry sector, approved and issued by the Ministry of Industry and Information Technology on 15 July 2026, with effect from 1 February 2027.

It is administered by the National Technical Committee for Dye Standardization.

Classification: ICS 71.100.01; 87.060.10; CCS G57.

1 Scope

HG/T 6526-2026 applies to the quality control of digital inkjet color paste of C.I. Reactive Blue 15 (Reactive Turquoise Blue P-GF). It is a product standard in the dye field for this specific colorant paste, which serves as an ink component in digital inkjet printing. The English translation reproduces the complete Chinese text.

It is intended for manufacturers of digital inkjet color pastes, for dye and ink testing laboratories, and for buyers such as ink makers and textile printers who want an agreed reference in supply contracts. Its code carries the /T suffix, so it is a voluntary industry standard. The Ministry of Industry and Information Technology approved it on 15 July 2026, and it comes into force on 1 February 2027. No earlier edition is replaced by this first issue.
